- Notes -**
- Maximum distance from power supply to monitor using 6pr BT cable CW1308 is 50M.
  - For distances 50M - 100M please add 2 x 1.0mm Brown and Blue singles per monitor (connections 1 & 3).
  - Maximum distance from power supply to entry panel using 1.5mm singles is 20M.
  - If using a DC release/maglock, a DC power supply and relay will be required.
  - On switcher AN7775 remove the PM jumper and adjust timer trimmer to minimum.
  - Set termination switch to 'L' position on monitor back plate.
  - Fit MOV suppression across lock connections to protect against back EMF.
