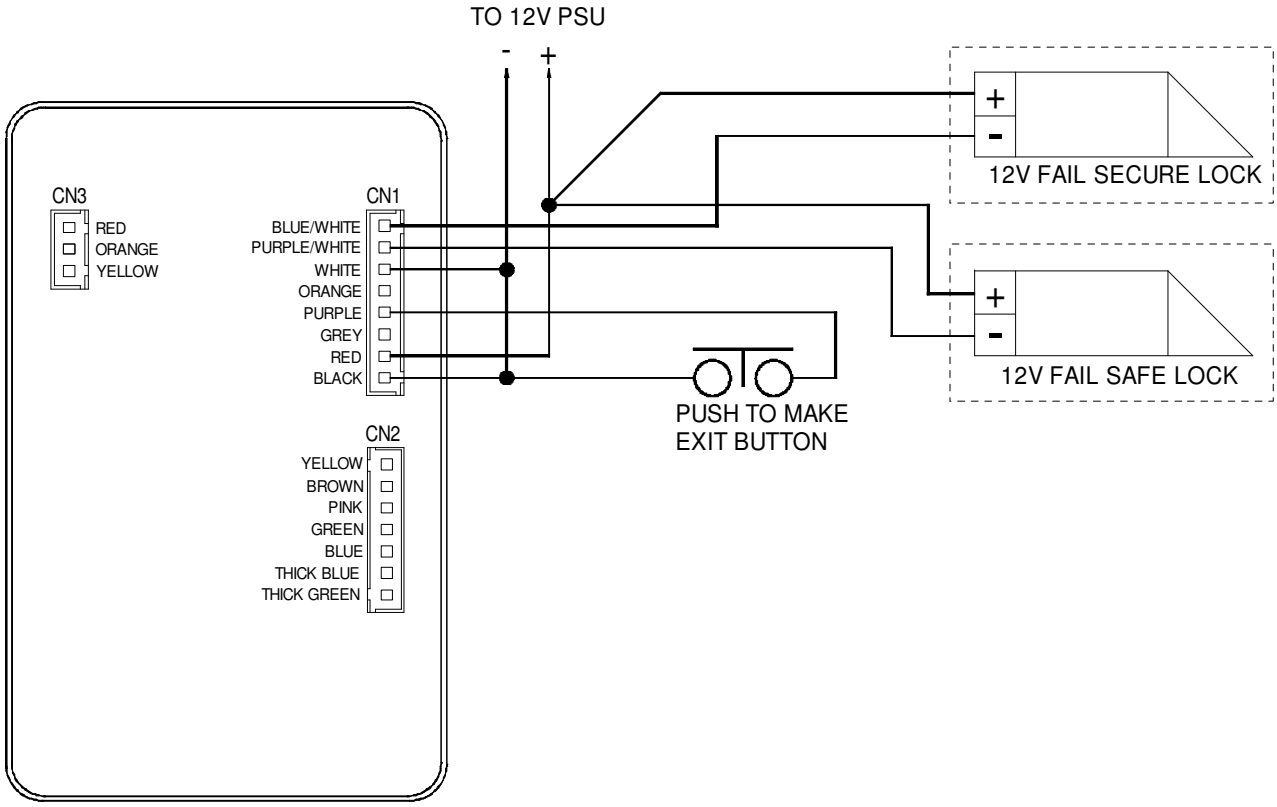
K50P

Quick Installation and Programming Guide

INSTALLATION



PROGRAMMING

Before you start:

It is advisable to delete all codes and restore factory settings before going any further, to ensure starting from a known condition.

Factory Reset:	**Enter**	***123456# (or *MASTER CODE# if changed)**
	Now press	**20*000#**
	Now press	**24*000#**
	Now press	**29*29*#**
	Now press	***# to exit.**

The Control Mode needs to be changed as follows if the K50 is to be used in a Stand-Alone application.

Change Mode	**Enter**	***123456# (or *MASTER CODE# if changed)**
	Now press	**04*8# to change to mode 8**
	Now press	***# to exit.**

Now Add User Codes:

Each user must be allocated to a memory location between 00000-01023 for administration purposes.

Adding a user:	**Enter**	***123456# (or *MASTER CODE# if changed)**
	Now press	**12*UUUUU*PPPP# (UUUUU= 5 digit user address and PPPP=4 digit User code)**
	Now press	***# to exit.**
Changing Lock Time:	**Enter**	***123456# (or *MASTER CODE# if changed)**
	Now press	**02*TTT# (where TTT= 3 digit time in seconds)**
	Now press	***# to exit.**
Enabling Exit Button:	**Enter**	***123456# (or *MASTER CODE# if changed)**
	Now press	**20*016#**
	Now press	***# to exit.**
