

Delay Timer T02

The function of this timer is to give a period of delay before activation on closure or opening of the trigger contacts.

This unit can be run either AC or DC, 12v

+ & -	Input voltage 12v AC or DC (observe polarity)
NC Trig	Normally closed contact going open to initiate start time
NO Trig	Normally open contact going closed to initiate start time
L	+VE
COM	Common pole of relay
NC	Normally closed contact of relay
NO	Normally open contact of relay

- Should you require to isolate the relay terminal, remove the wire link at the rear of the terminal block

The relay contacts are rated at 1.5 amp 12v DC

NOTE: If normally open contact is used link out normally closed.
